

# MD AKBAR ANSARI

Software Engineer | Full-Stack Developer

+91 6200086815 | akbarnuman009@gmail.com | [linkedin.com/in/mdakbaransari](https://www.linkedin.com/in/mdakbaransari) | [github.com/akbarnuman](https://github.com/akbarnuman)

## SUMMARY

Full-stack Software Engineer (B.Tech CS, 2026) skilled in React.js, Node.js, Express.js, MongoDB, REST APIs, and real-time systems (Socket.IO), with a background in DSA and coursework in Generative AI and Agentic AI. Seeking a Software Engineer role to build scalable, user-facing products.

## TECHNICAL SKILLS

- Languages: Java, JavaScript, HTML5, CSS3
- Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS, discord.js
- Databases: MongoDB, MongoDB Atlas, Mongoose
- Tools & Platforms: Git, GitHub, Socket.IO, JWT, Vercel, Render, Cloudinary, Postman
- Core Concepts: Data Structures & Algorithms, REST API Development, Agile/Problem-Solving, Generative AI, Agentic AI, Cloud Computing

## PROJECTS

### Real-Time Chat Application

May 2026

React.js · Node.js · Express.js · MongoDB Atlas · Socket.IO · Cloudinary · JWT

- Built a full-stack real-time messaging platform supporting both personal and group chats with persistent message history via MongoDB Atlas.
- Implemented JWT-based authentication and authorization, alongside live online-status and typing-indicator features using Socket.IO for bidirectional real-time communication.
- Integrated Cloudinary for file sharing and voice-message uploads, replacing local disk storage to support stateless, scalable deployment.
- Designed and built REST APIs connecting the React frontend to the Node/Express backend; deployed frontend on Vercel and backend on Render.

### Smart Mushroom Disease Detection Platform

Nov 2025

React.js · Node.js · Flask · TensorFlow · MongoDB Atlas

- Developed a full-stack AI-powered web application enabling real-time mushroom disease detection from user-uploaded images.
- Integrated a Flask microservice serving a TensorFlow (model.h5) image-classification model, decoupled from the main Node.js API layer.
- Implemented JWT authentication, Multer-based image upload handling, and persistent prediction-history tracking per user.
- Built REST APIs to coordinate communication across the React frontend, Node.js backend, and Flask ML service; deployed frontend on Vercel, backend and ML service on Render.

### Potato — Discord Reading Bot

2026

Node.js · discord.js · MongoDB · Mongoose · Axios · node-cron

- Building a full-featured Discord bot for reader communities, integrating Open Library and Wikiquote/ZenQuotes APIs for book search, author lookups, and quotes.
- Designed a reading-tracker system (start/progress/finished commands), wishlist, and streak tracking backed by MongoDB/Mongoose schemas.
- Implemented public reading profiles with auto-calculated stats and unlockable badges, plus a scheduled daily quote-of-the-day job via node-cron.
- Deployment in progress: Render hosting with an Express keep-alive endpoint and uptime monitoring planned for continuous availability.

## CERTIFICATIONS

- AI Agents and Agentic AI with Python & Generative AI — [Vanderbilt University](#) Feb 2026
- Generative AI with Large Language Models — [DeepLearning.AI & AWS](#) May 2024
- Cloud Computing — [IIT Kharagpur \(NPTEL\)](#) Oct 2024
- Server-Side JavaScript with Node.js — [NIIT](#) Apr 2024
- Data Structures and Algorithms — [Udemy](#) Feb 2024

## EDUCATION

### Bachelor of Technology, Computer Science and Engineering

May 2026

Lovely Professional University, Phagwara, Punjab — CGPA: 7.0

### Intermediate (PCMB)

Mar 2022

Giridih College, Giridih, Jharkhand — 71.4%

### Matriculation

Mar 2020

BNS DAV Public School, Giridih, Jharkhand — 77.4%

## ADDITIONAL

- Languages: German (A2 level).
- Volunteer teaching, Abhilasha Foundation — adapted methods to diverse learning needs.
- HacktoberFest & Augmented Reality (Spark Studio) workshops — open-source, Git/GitHub, AR development.
